

Heating mass

For heating (drying) of lead/paper insulated telecommunication cables

Features

- For water resistant impregnation and heating of PILC and jointing materials
- Filopreg is heated together with a heating mass
- Mixing ration 1 : 10 (Filopreg : Heating mass)

Specifications

Material	Hydrocarbon
Storage conditions	Max. 30°C
Substance form	Solid up to 70°C
Colour	White
Density	0.9 g/cm ³

Heating mass

More info

For water resistant impregnation and heating of PILC and jointing materials, add 100 gram Filopreg to 1000 gram

Heat mass together

Products

Art.nr.	Product Name	Order unit
80820test	Heating mass	18 kg/carton
80822test	Filopreg 100 gram	120 pcs/carton
