

Yellow gauze

This polyester gauze is used to create sufficient insulation distance between the conducting parts within the injection joint. Furthermore the gauze contributes to a proper flow of the resin into the joint.

Features

- The special mesh structure of this gauze prevents the sides from fraying
- In comparison to other materials, the material has an extremely low moisture absorption
- Yellow colour for a visible contrast with the resin
- Not hygroscopic
- The roughness of the structure provides excellent skid resistance
- 1,0mm thick mono filament polyester

Specifications

Material	100% Monofil Polyester
Thickness thread	0,25mm
Thickness gauze	1,0mm
Number of threads in width	13
Diameter roll	± 85mm
