

Filoform screw type nipple for plastic bags

Opening for 2 component resin packs
Opening for plastic foil packaging used in the food and pharmaceutical industries

Features

- Quick, easy and hygienic opening system
- System consists of just 2 parts. Screw opener and self adhesive screw ring
- User friendly
- Foil packaging with preassembled screw ring available on request

More info

The excellent adhesiveness of the screw ring and the special incisor of the screw nipple enables you to open any type of plastic foil bag without any damage. Stick the screw ring on the bag. Turn the screw nipple through the screw ring. See how easily your bag is opened. An opened bag is closed with the cap.
