To partner with the Filoseal+HD and Filoseal+HD FIRE, Filoform have created frames to hold a seal where the space or structure will not allow fitting of a seal into the structure itself.

Up to 4 hours fire resistance in transit frames (single side)
Tested to BS EN1366-3 2009
Upto 2 bar Pressure Resistance
100Kg pulling Force on the cables when sealed
10xd at 45º, with 1 bar pressure bending test

Specifications

The modularity of the frame is based around two opening sizes; they are 120 x 120mm (type A) or 120 x 240mm (type B) which

somewhat follows the frame sizing of regular transit systems. Obviously, for a larger hole, we build a multi-opening frame to

Built frames - (A Frame & B Frame)

Built frame size notation.

Frames of **Type A** (120 x 120 opening). For clarity, all frames are 120 wide, it is the height that changes.

Frame types followed by an 'xn' notation means there are n number of openings set out horizontally in a row.

Frames types followed by a '+type **A** or **B**' notation mean the frames are stacked vertically on top of each other.

So a frame denoted A+A+A x8 means there are 24 openings in total of size A, in columns of 3 high 8 times over.
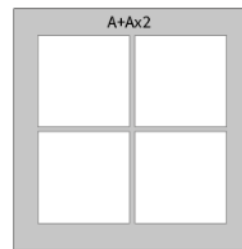

Cable Transit Frame Key
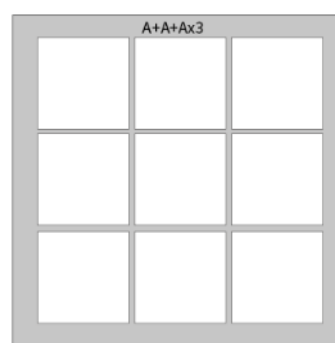

Ax1

A x 1 (1 opening, 120x120mm)

Ax2

A x 2 (2 openings, side by side 120x120mm)

A+A (2 openings on top of each other 120x120)

A+A

A+Ax2

A+A x 2 (4 openings, 2 in a row x 2 high 120x120mm))
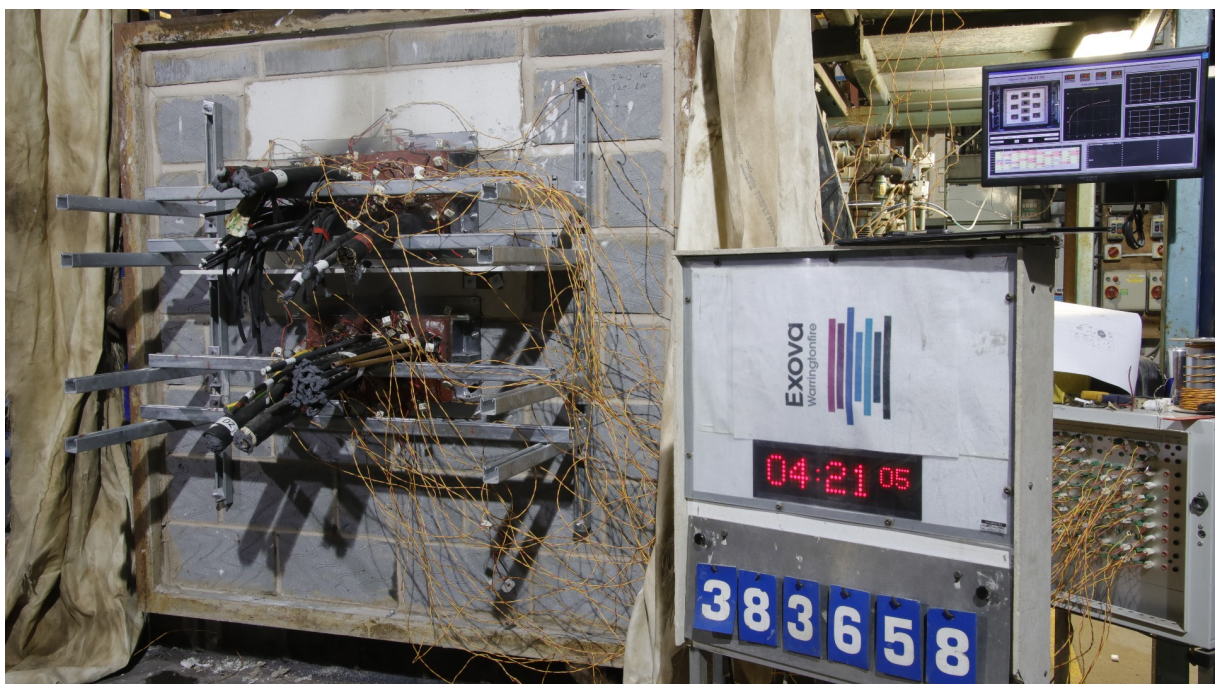

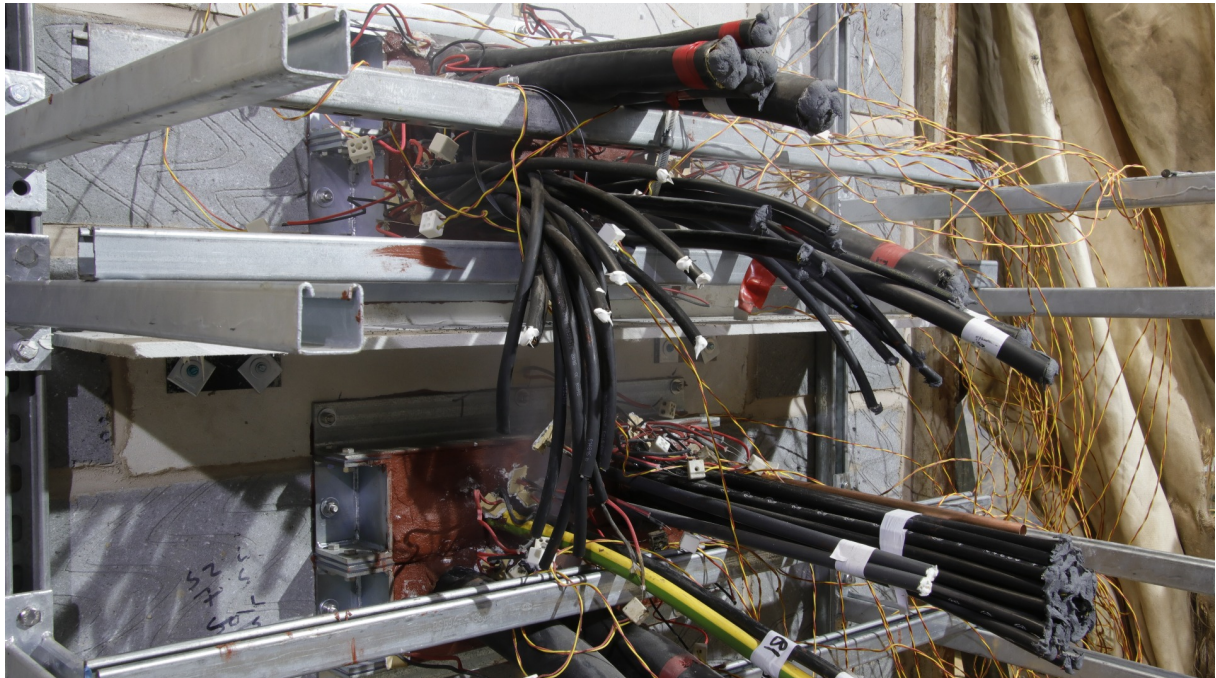

A+A+A (3 openings on top of each other 120x120)

A+A+A

A+A+Ax3

A+A+A x 3 (9 openings, 3 in a row x 3 high 120x120mm)
