

MV insulation Barrier Boots

Filoform have a complete range of Heatshrink Insulating Boots to accommodate the Heatshrink Indoor/Outdoor Terminations, incorporating a high quality sealing mastic to form an effective barrier against fluids and moisture.

The range is designed to offer resistance to the long term effects of UV and weathering, and is anti-tracking. A 2-3:1 shrink ratio, enables the full range of cable diameters to be covered by a small number of kits.

All of the kits are RoHS compliant.

Features

- Manufactured from high grade Silicone Rubber.
- Available in straight and angled versions.
- Nontracking and erosion resistant.
- Suitable for indoor and outdoor.
- UV resistant.
- RoHS compliant.
- Large Heatshrink ratio.
